

Printing Suggestions

- Many of the lessons include color photos and illustrations. The file name includes the word color if printing those lessons in black and white will adversely affect the quality of the lesson.
- All files have been converted to PDF documents for ease of use.
- Curriculum is divided into 6 units with 4 lessons within each unit. Each folder on the CD contains the material for one lesson in that unit. The name of the file indicates the unit and lesson. For example, the file named: **Page 4. Unit 1 L1 vocabulary.PDF** indicates that this is the fourth page in first lesson of Unit 1 and it contains the list of vocabulary words.
- The files are numbered (but not the pages themselves!) so that they can be printed and placed in the correct order as they are printed.
- For the instructor books, you may want to print the Lesson Plan Overview on colored paper making it easier to see in the instructor's binder.
- Each lesson that contains a worksheet also includes an answer key for the instructor.
- For the pilot classes, we distributed only the lesson that was being taught in that particular class period to the students and the students accumulated the lessons in a binder of their own.
- A 3 inch binder is needed in order to accommodate all of the materials for the course. Students in the pilot requested two smaller binders and we found that worked well. Instructors, however, used the large 3 inch binders.
