

## Unit 2 Lesson 4 Flowchart for Repositioning a Resident in Bed

*Fill in the blanks with the correct word based on the flow chart.*

If a patient cannot assist, the caregiver will need to use a \_\_\_\_\_ lift or a \_\_\_\_\_ device and \_\_\_\_\_ or more caregivers.

If a patient can fully assist, \_\_\_\_\_ is not needed.

If a patient can partially assist and is \_\_\_\_\_ than 200 pounds, use a \_\_\_\_\_ device and at least 3 caregivers. If a patient is more than \_\_\_\_\_ pounds, use a friction-reducing device and two to three \_\_\_\_\_.
